Phagwara, Punjab, India

SUMMARY

Motivated Computer Science Engineer with hands-on industry experience as an AI Engineer, plus additional experience in machine learning, NLP, and full-stack web development. Skilled in building end-to-end AI pipelines including a Sanskrit RAG system and sentiment analysis models, and deploying scalable web applications with Flask and Django. Proficient in Python, C/C++, and JavaScript with practical exposure to cloud platforms (Oracle OCI, SAP Analytics Cloud) and industry-standard testing practices.

EXPERIENCE

AI Engineer

Nyukt AI Technology and Innovations Pvt. Ltd.

Bengaluru, India

Jan 2026 – Jun 2026

- Worked as a full-time **AI Engineer**, delivering **AI-driven solutions** in a fast-paced technology environment while demonstrating strong technical competence and a results-driven mindset.
- Collaborated closely with cross-functional teams and leadership, maintaining excellent working relationships and consistently applying strong **problem-solving** skills to project requirements.
- Adapted quickly to evolving technical demands, contributing to the company's engineering initiatives with professionalism and integrity throughout the tenure.

Machine Learning Intern

Certified Internship (MCA-Accredited) | Accredited by Ministry of Corporate Affairs, Govt. of India

Certificate ID: ATPL2024-557

May 2024

- Applied supervised and unsupervised learning techniques including **classification**, **regression**, **clustering**, and **dimensionality reduction** on real datasets.
- Gained practical exposure to ML-driven decision-making, **automation workflows**, and business intelligence applications in corporate environments.
- Worked with Python-based ML libraries (**Scikit-learn**, **Keras**) to build and evaluate predictive models end-to-end.

PROJECTS

Sanskrit Document RAG System

Aug 2025

Stack: LangChain, FAISS, Hugging Face, Docker

- Designed an end-to-end **RAG** system for Sanskrit literature using LangChain and Hugging Face (google/flan-t5-base), producing context-grounded, hallucination-free responses on a CPU-only architecture.
- Engineered a semantic search pipeline by chunking documents and using **FAISS** with Sentence Transformers (paraphrase-multilingual-MiniLM), achieving sub-100ms vector retrieval times for historical text corpora.
- Developed a custom NLP preprocessing module with Indic-transliteration to support dual-script queries (Devanagari and IAST) and containerized the application using **Docker** for reproducible, GPU-independent deployment.

Sentiment Analysis Model

May 2024

Stack: Python, NLP, NLTK, Scikit-learn, TF-IDF

- Developed and deployed a scalable **sentiment analysis** model to process and extract insights from large volumes of customer feedback and reviews.
- Applied NLP techniques including **word embeddings** and **TF-IDF** to enhance sentiment classification accuracy, uncovering actionable patterns in customer emotion data.
- Delivered insights that guided targeted marketing strategies, resulting in measurable improvements in customer engagement and relations.

Weather Forecast Web Application

Apr 2025

Stack: Python, Flask, REST API, Bootstrap, Jinja2

- Fetches and processes real-time weather data (temperature, humidity, wind speed, conditions) via HTTP requests and **JSON** parsing from a third-party REST API.
- Implemented dynamic rendering with **Jinja2** templates to deliver an interactive, responsive user interface; handled edge-case error responses to improve application reliability.
- Built with Python, Flask, REST API, HTML/CSS, and Bootstrap for a scalable and efficient production-ready deployment.

TECHNICAL SKILLS

Languages: C/C++, Python, HTML, CSS, JavaScript, MySQL

Frameworks & Libraries: Scikit-learn, Keras, NLTK, LangChain, FAISS, Flask, Django, Bootstrap

AI / ML: Supervised & Unsupervised Learning, NLP, RAG, TF-IDF, Sentiment Analysis

Tools & Platforms: Git/GitHub, Google Colab, VS Code, Docker, Oracle Cloud Infrastructure, SAP Analytics Cloud

Soft Skills: Problem-Solving, Team Collaboration, Adaptability, Critical Thinking

EDUCATION

Lovely Professional University

Bachelor of Technology – Computer Science and Engineering — CGPA: 7.40

Phagwara, Punjab, India

2022 – 2026

CERTIFICATIONS & ACHIEVEMENTS

SAP Certified – Data Analyst (SAP Analytics Cloud), SAP (Mar 2026)

Oracle Cloud Infrastructure 2025 – AI Foundations Associate, Oracle (Sep 2025)

Proctored Software Testing – NPTEL (Oct 2024) | **Data Structures & Algorithms** – GeeksforGeeks (Jul 2024)

LeetCode – Solved 150+ problems across Easy and Medium difficulty (Feb 2025)

CodeChef – Achieved Silver Badge in both C++ and Python (Jan 2025)
